DETAILED ACTION

Claims 65-66 and 68-84 are pending. Applicant's amendments necessitate an election/restriction requirement.

Election/Re strictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 72-84, drawn to determining which services listed in a program guide a terminal is authorized to receive, classified in class 380, subclass 239.
- II. Claims 65-66 and 68-71, drawn to parsing received packets to determine whether to display a first service or second service at a terminal, classified in class 725, subclass 42.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I does not require displaying a second service should the terminal not be authorized to display a first service as required by invention II. The subcombination has separate utility such as a method to automatically display advertisements for additional services on channels a

terminal is not authorized to receive service. Note that invention II also does not necessarily require use of an electronic program guide.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
